

### DOMESTIC WATER SUPPLY

#### NBB is the solution for a domestic pressurizing system.

The basic concept is the modularity of its components such as :  
the NBB TANK KIT, the submerged or the surface pump, the inverter (in case the pump is without integrated electronics) and an assembling kit including the expansion tank (where this is not integrated in the pump itself).

In all its different configuration the NBB is characterized by its compact dimension , great comfort and, in the version with inverter, also by an important aspect in terms of energy saving.

NBB TANK KIT consists of:

- 280 Lt. tank suitable for potable water compliant with the european norms EN1717 e EN13077

- Equipped with Filling valve and overflow valve
- Protection grid

Choosing the ADDITIONAL TANK KIT, consisting of a 280 liter tank, the junction elbow plus gasket and a belt, it's possible to double the capacity of the system.

In addition to the NBB it is necessary to chose the assembling kit corresponding to the type of pump (or pump with inverter) to be utilized.

The pump to be installed , as well as the inverter, are not included in the kit and must be order separately.

the installation kit comprehends all the accessories necessary for the installation of the pump (or the inverter) to the NBB TANK KIT For the PULSAR and EUROINOX installation kits, also a 4 liter expansion tank is included.

MODEL	CODE
KIT NBB - WRAS TANK 280 LT.	60149355
KIT ACTIVE FOR NBB	60116646
KIT EUROINOX FOR NBB	60123882
KIT PULSAR FOR NBB	60116638
KIT DIVERTRON FOR NBB	60123662
KIT ADDITIONAL TANK	60123556

Installation kit are designed for exclusive use with pump models specified below
